Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported.

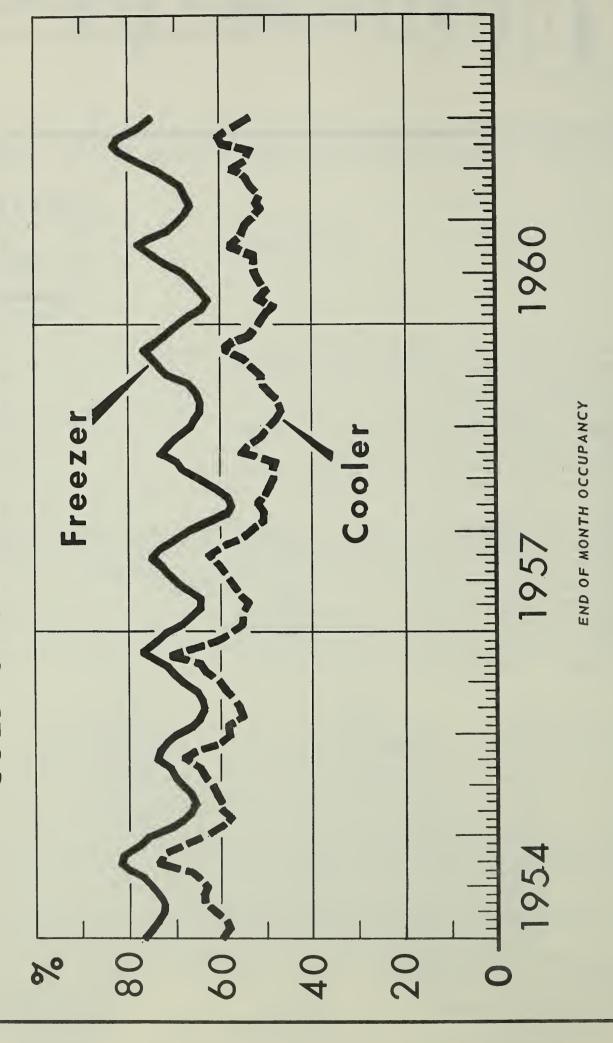

All January 31, data are preliminary.

SPECIAL IN THIS ISSUE: Package-size breakdown of strawberry stocks.....

PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

NEG. SRS 24- 62 (2) STATISTICAL REPORTING SERVICE

U. S. DEPARTMENT OF AGRICULTURE

Commodity summary

February 1 stocks in refrigerated warehouses totaled 6.2 billion pounds, a decline of 536 million for the previous month. However, these refrigerated stocks were at a new high for this time of year, exceeding by 802 million pounds the previous record established last year. Holdings of frozen fruits, vegetables, and poultry also were at record levels for the date. Stocks of 487 million pounds of frozen fruits compare with 452 million held on February 1, 1961 and 441 million pounds, the 1957-61 average for the date. Frozen vegetable stocks declined seasonally during January and on February 1 totaled 1.1 billion pounds. This time last year, 906 million pounds were stored while the average for the date is 798 million pounds. A greater than usual January reduction lowered frozen poultry stocks 24 million pounds to 408 million pounds. Stocks of turkeys totaled 253 million pounds. These turkey holdings were 47 percent above a year earlier and 54 percent greater than average. A net gain of 16 million pounds raised butter stocks to 241 million pounds which compares with 76 million this time last year and the average for the date of 58 million pounds. American cheese holdings declined 18 million pounds during January to 402 million on February 1. This was 40 percent above the holdings a year earlier and 34 percent greater than average. Holdings of shell eggs, at 29,000 cases, were the smallest for the date since 1928. Frozen egg supplies, down to 49 million pounds, were 10 percent under the stocks of February 1, 1961 and 23 percent below average. Red meat stocks of 482 million pounds compare with 446 million held this time last year and 516 million, the average for February 1. Beef holdings declined more than usual in January but the gain in pork stocks fell short of the average gain during the month.

Cooler and freezer stock changes

Product weight in cooler space on February 1 dropped below the 3.1 billion stored a month earlier. A net reduction of about 500 million pounds left 2.6 billion pounds. The major reduction was in stocks of fresh fruits and vegetables, while holdings of cheese, milk, and eggs were reduced by smaller amounts. Partially offsetting these seasonal declines were gains in stocks of dried and evaporated fruits, nuts, and red meats. Freezer stored products were down to 3.5 billion pounds as holdings of all items except butter, juices, and pork were lowered during January. Although the 70 million pound reduction during the month was greater than both the decline last year and the average disappearance for the month, stocks on February 1 were at a record level for the date.

Storage occupancy in public warehouses

Occupancy of both cooler and freezer space in public warehouses declined during January. Cooler occupancy, at 53 percent on February 1, was down 4 percentage points from January 1 but was the same as on February 1, 1961 and the February 1, 5-year average. Unlike the national reduction, cooler occupancy remained unchanged in the South Atlantic Region and gained slightly in the Pacific. Freezer occupancy, at 75 percent on February 1, was off 3 percentage points from a month earlier. On February 1 last year, freezer occupancy was 69 percent, while the 1957-61 average for the date is 68 percent. The decline in freezer occupancy during January was shared by all regions except the South Atlantic, where occupancy advanced due primarily to increased holdings of frozen citrus concentrate.

Dairy products

Warehouse holdings of butter totaled 241 million pounds on February 1, up 16 million from the month before. This time last year, stocks totaled 76 million pounds. Average February 1 stocks are 56 million pounds and the average net change during January is a drop of about a million pounds. Government-owned butter reported on February 1 totaled 203 million pounds, leaving 38 million pounds in commercial channels. The commercial quantity a year earlier was 18 million pounds and the February 1, 1957-61 average is 22 million pounds. The 18-million-pound net reduction in stocks of American cheese during January brought warehouse holdings to 402 million pounds on February 1 which compares with 267 million in storage a year earlier.

Average stocks at this time of year are 300 million pounds. Government holdings of American cheese totaled 48 million pounds. February 1 stocks of cream totaled 7 million pounds, unchanged from the month before and also the same as on February 1 1961 and average.

Fruits, vegetables, and juices Frozen fruit holdings on February 1 totaled 487 million pounds, a record for the date. These supplies were 8 percent above those of February 1, 1961 and 10 percent above average for the date. Holdings were reduced seasonally during January by 44 million pounds, which compares with a net reduction of 31 million a year earlier and the average January decline of 36 million pounds. Except for a gain of 7 million pounds in stocks of frozen apples, holdings of all other fruit items were lowered during the month. The largest reduction was 19 million pounds of strawberries which lowered those stocks to 132 million pounds. Strawberry stocks were 10 percent under February 1 a year ago and 15 percent below average. Holdings of frozen vegetables were unusually high for the date. The 1.1 billion pounds stored on February 1 were 24 percent larger than a year earlier and 40 percent greater than average. Much of this change in the storage level can be attributed to the significant quantity of frozen french fries being stored. Stocks of this item on February 1 were up to 191 million pounds compared with 154 million on February 1, 1961. Aside from frozen french fried potatoes, the only other vegetable item that gained during January was mixed vegetables. The largest reduction was 28 million pounds of peas which left 181 million pounds. This was one-fourth larger than a year ago February 1 and 3 percent above average. Processing of orange juice in Florida added about 12 million gallons to warehouse holdings, which brought the February 1 total to 30 million gallons. At this time a year ago, stocks totaled 23 million gallons, while 26 million is average. Fresh apples, at 25 million bushels, were 3 million larger than the stocks of February 1, 1961 and 1 million bushels above average. The 864,000 boxes of pears held on February 1 were about 31 percent less than a year earlier and 37 percent under average.

Poultry and poultry products
February 1 holdings of poultry meats totaled 408 million pounds, a record for the date, exceeding the previous February 1 high of 364 million pounds in 1946. This inventory was a reduction of 24 million pounds from the January 1 holdings. A year earlier, stocks totaled 304 million pounds and the 5-year average is 314 million.

Broiler holdings declined seasonally during January by 5 million pounds to 28 million on February 1. A year earlier, stocks totaled 22 million while average stocks for this time of year is 24 million pounds. Turkey holdings on February 1 totaled 253 million pounds, the largest for the date but a drop of 10 million pounds from the January 1 inventory. Shell egg stocks in refrigerated warehouses totaled 29,000 cases, the smallest amount recorded for February 1 since 1928 and the lowest for any month since March 1, 1936. A net reduction of 13 million pounds of frozen eggs during January left 49 million pounds in storage on February 1. Last year at this time, holdings were 54 million while the February 1, 1957-61 average is 63 million pounds.

Meat and meat products
Refrigerated stocks of red meats totaled 482 million pounds on February 1 following a contra-seasonal decline of 3 million pounds during January. This reduction compares with an increase of 22 million pounds during January last year and a 5-year average rise of 20 million pounds. An 8-million-pound net increase in total pork stocks brought February 1 holdings to 208 million pounds. This compares with a 31-million-pound gain during January 1961 and the average increase of 30 million pounds. Frozen pork gained 6 million pounds to total 170 million pounds on February 1 and cured pork increased 2 million pounds to 39 million pounds. Other meats increased 2 million pounds during January and amounted to 87 million pounds on February 1.

^{1/} Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the Armed Services, and other Government agencies. In addition to stocks reported above, Armed Services hold some stocks in space owned by them on which figures are not available.

2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.
